

IGF2BP1 Ab

[References\(2\)](#) [Images\(5\)](#)

Cat.#: DF6436

Size:

Concn.: ~1mg/ml

Source: Rabbit

Mol.Wt.: 63kDa

Clonality: Polyclonal

Application:

WB 1:500-1:2000, IHC 1:50-1:200

*The optimal dilutions should be determined by the end user.

Reactivity:

Human,Mouse,Rat

Storage:

Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from date of receipt.

Purification:

The antiserum was purified by peptide affinity chromatography using SulfoLink™ Coupling Resin (Thermo Fisher Scientific).

Immunogen:

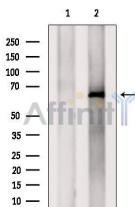

A synthesized peptide derived from human IGF2BP1, corresponding to a region within N-terminal amino acids.

Uniprot:

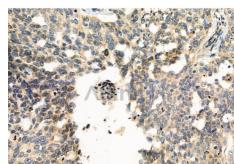

Q9NZI8

Description:

Insulin-like growth factor-II mRNA-binding proteins (IMPs) belong to a family of zipcode-binding proteins (1,2). Three members of this family, IMP1, IMP2, and IMP3, have been identified (1,2). They contain two RNA recognition motifs, four K homology domains, and were found to function in mRNA localization, turnover, and translation control (1,2). Research studies have implicated these proteins in a variety of physiological and pathological processes, such as growth and development , testicular neoplasia , and melanocytic neoplasia .

Western blot analysis of extracts from MCF7, using IGF2BP1 Ab. The lane on the left was treated with blocking peptide.

DF6436 at 1/100 staining Human ovarian cancer and adjacent normal tissues by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the primary Ab at 4°C overnight. An HRP conjugated anti-Rabbit Ab was used as the secondary Ab.
